

Parasitoids and Predators maintained at ICAR- NBAIR, Bengaluru

Biocontrol Agent	Stage supplied	Systematic position	Target pest	Recommended dosage	No. of releases recommended
PARASITOIDS					
<i>Trichogramma chilonis Ishii (I) #</i>	Parasitised egg cards	Hymenoptera: Trichogrammatidae	Sugarcane borers <i>Chilo infuscatellus, Chilo sacchariphagus indicus, Chilo auricilius, Acigona steniellus; Cotton (Non Bt) bollworms Helicoverpa armigera, Pectinophora gossypiella& Earias spp.; Maize stem borer Chilo partellus, Diamond back moth <i>Plutella xylostella; Tomato fruit borer Helicoverpa armigera</i></i>	50,000/ha on sugarcane and vegetable s; 100,000/ha on maize and 1,50,000/ ha on cotton	Sugarcane: 4 to 6 releases at 10 days intervals for early shoot borer; 8 to 10 releases for stalk, internode and Gurdaspur borers Cotton (Non Bt) & Vegetables: Six weekly releases
<i>Trichogramma japonicum(I)</i>	Parasitised egg cards	Hymenoptera: Trichogrammatidae	Top shoot borer of sugarcane <i>Scirpophaga excerptalis and Paddy stem borer Scirpophaga incertulas</i>	Sugarcane & Paddy: 50,000/ha	Sugarcane: 4 to 6 releases at 10 days intervals on observing pest or from 60th day Paddy: 6 releases on appearance of pest or from 30th day after

transplantation

<i>Trichogrammaachaea</i>(I)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Cotton (Non Bt) bollworms and Bhendi Borer	1,50,000/ha on cotton (Non Bt)	Six releases at weekly intervals
				50,000/ha on vegetables	
<i>Trichogrammapretiosum</i>(E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Tomato fruit borer <i>Helicoverpa armigera</i>	50,000/ha	Six releases at weekly intervals on appearanc e of pest or from 45th dayfrom transplata tion
<i>Trichogrammaembryophagum</i>(E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Apple Codling moth <i>Cydiapomonella</i>	2000 adults per tree or 100,000/ha	Releases starting from the first moth catch, continue at weekly intervals till pest egg availabilit yin thefield
<i>Trichogrammadendrolimi</i>Matsumara (E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Targeted against tissue borers on maize and sugarcane – For Researchwork	-	-
<i>Trichogrammabrasicae</i>(E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Diamondback moth <i>Plutellaxylostella</i> and Cabbage butterfly <i>Pierisbrassicae</i> on cabbage and cauliflower	100,000/ha	Six releases at weekly intervals

<i>Trichogrammaea nescens</i> Westwood	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Targeted against tissue borers on maize and sugarcane - For Researchwork	-	-
<i>Trichogrammaw anzai</i> (E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Targeted against <i>Helicoverpa armigera</i> - For Research work	-	-

<i>Trichogrammatoid eaarmigera</i> (E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Targeted against <i>Helicoverpa armigera</i> - For Researchwork	-	-
<i>Trichogrammatoid eabactrae</i> (E)*	Parasitise d egg cards	Hymenoptera: Trichogrammatidae	Diamond back moth <i>Plutellaxylostella</i> on cabbage	2,50,000/ha	Five releases at weekly intervals
<i>Telenomusremus Nixon</i> (E)	Parasitise d egg cards	Hymenoptera: Scelionidae	Tobacco caterpillar <i>Spodoptera litura</i>	1 lakh /ha	Three to four releases
<i>Goniozusnephantidis</i> (Muesebeck) (I)	Cocoons	Hymenoptera: Bethylidae	Coconut black- headed caterpillar <i>Opisina arenosella</i>	10 adults per palm	Four releases
<i>Chelonusblackburnii Cameron</i> (E)*	Adults	Hymenoptera: Braconidae	Potato tuber moth <i>Phthorimaea operculella</i>	50000 adults /ha in the field 2 adults per kg of potatoes in godowns	Two releases at weekly intervals Three to four releases (or as per need) at fortnightly intervals

*Only Nucleus culture will be supplied, either for research work or for further scaling up for commercialization #

Sugarcane, Cotton and Vegetable strains of *T. chilonis* maintained;

I: Indigenous; E: Exotic

Biocontrol Agent	Stage supplied	Systematic position	Target pest	Recommended dosage	No. of releases recommended
PREDATORS					
<i>Cryptolaemusmontrouzieri</i> Mulsant (E)	Adults / Grubs	Coleoptera: Coccinellidae	Mealy bugs <i>Maconellicoccus hirsutus</i> , <i>Planococcuscitri</i> , <i>P. lilacinus</i>	10 beetles or 50 grubs /infested plant or tree or 5000 beetles/ha	One or more releases based on pest intensity
<i>Scymnuscoccivora</i> (Ramakrishna Ayyar) (I)	Adults	Coleoptera: Coccinellidae	Mealy bugs on citrus, grapes and other fruit crops (<i>M. hirsutus</i> , <i>Planococcus</i> spp.)	600 – 2500 adults/ha	One or more releases based on pest intensity
<i>Chilocorusnigrita</i> (Fabricius) (I)	Adults / Eggs	Coleoptera: Coccinellidae	Sugarcane scale insect <i>Melanaspisglomerata</i> <i>Citrus</i> scale <i>Aonidiellaaurantii</i>	1500 beetles/ha; or 10 egg pads (with 40 eggs per pad) in 100 spots/ha (40,000 eggs/ha)10 adults/tree	One or more releases based on pest intensity
<i>Cheiromene sexmaculata</i> (Fabricius) (I)*	Adults / Eggs	Coleoptera: Coccinellidae	<i>Aphis craccivora</i> on legumes and <i>Lipaphiserysimion</i> oilseed crops	5000 larvae or 500 adults per ha	Two releases; first release to coincide with the appearance of aphids
<i>Coccinellaseptempunctata</i> Linnaeus (I)*	Adults / Eggs	Coleoptera: Coccinellidae	<i>Aphis craccivora</i> on legumes and <i>Lipaphiserysimion</i> oilseed crops	5000 larvae or 500 adults per ha	Two releases; first release to coincide with the appearance of aphids
<i>Brumoidessuturalis</i> (Fabricius) (I)*	Adults	Coleoptera: Coccinellidae	Aphids and white flies	-	-
<i>Curinuscoeruleus</i> Mulsant (E)	Adults	Coleoptera: Coccinellidae	Subabul psyllid <i>Hetropsyllacubana</i>	20 Adults per tree	Two releases during July and October

<i>Chrysoperlacarnea</i> (Stephens) (I)	Eggs / First instar larvae	Neuroptera: Chrysopidae	Sucking pests on cotton, tobacco, sunflower, groundnut & some fruit crops	10,000 first instar larvae/ha	Twice during the season with an interval of 15 days On fruit crops, 10 – 20 larvae per infested tree
<i>Malladaspp. (I) *</i>	Cocoons	Coleoptera: Coccinellidae	Sucking pests on cotton, tobacco, sunflower, groundnut & some fruit crops	10,000 first instar larvae/ha	Twice during the season with an interval of 15 days On fruit crops, 10 – 20 larvae per infested tree
<i>Ischiadonscutellaris</i> (Fabricius) (I) *	Cocoons	Diptera: Syrphidae	<i>Aphis craccivora</i> on legumes and <i>Lipaphis erysimi</i> on oilseed crops	5000 larvae/ha	-
<i>Micromustimidus</i> (Hagen) (I) *	Larvae	Neuroptera: Hemerobiidae	<i>A. craccivora</i> on legumes & oilseeds & Sugarcane Woolly Aphid	Research in progress	Research in progress
<i>Cardiastethus sexiguus</i> (Poppius) (I)	Adults/Nymphs	Hemiptera: Anthocoridae	<i>Opisina arenosella</i> a Coconut black-headed caterpillar	50 nymphs/adults per tree	Three releases
<i>Blaptostethus pallescens</i> (Poppius) (I)	Adults/Nymphs	Hemiptera: Anthocoridae	Spider mites on bhendi	5 to 10 nymphs per plant	Five releases
<i>Xylocorisflavipes</i> (Reuter) (I) *	Adults/Nymphs	Hemiptera: Anthocoridae	Storage pests	For research work	-
<i>Oriustantillus / Oriusmaxidente x.</i> (I) *	Adults/Nymphs	Hemiptera: Anthocoridae	Thrips	For research work	-

*Only Nucleus culture will be supplied, either for research work or for further scaling up for commercialisation!

<i>Trichogrammaspp.</i> & <i>Uscanaspp.</i> maintained in the Bio-systematics Laboratory – All indigenous			
Species	Locality of collection	Host insect / plant on which Collected	
<i>Trichogrammaachaea</i> Nagaraja& Nagarkatti	Tumkur and Saligrama strains	-	
<i>Trichogrammadanausicida</i> Nagaraja	Local, Aligarh, and Hessaraghatta strains	Ex. <i>Catopsiliapyrantheon Cassia Fistula</i>	
<i>Trichogrammasemblidis</i> (Aurivillius)	Nr. Hessaraghatta	Ex. Tabanid eggs on paddy leaves	
<i>Trichogrammasp. nr. cuttackensis</i> Nagaraja	Someshwar, Udupi dt.	Ex. Sciomyzid eggs on paddy leaves	
<i>Trichogrammasp. n. (being described)</i>	Balehonnur	Ex. Unidentified pierid eggs (? <i>Catopsiliapyranthe</i>)	
<i>Trichogrammaflandersi</i> Nagaraja& Nagarkatti	Mandya	Ex. Eggs of <i>Chiloinfuscatellus</i> on young sugarcane	
<i>Trichogrammachilotraeae</i> Nagaraja& Nagarkatti	Bijwara	Ex. Eggs of <i>Lampidesboeticus</i> on <i>Cajanuscajan</i>	
<i>Trichogrammatoideabactrae</i> Nagaraja	Hessaraghatta	Ex. eggs of <i>L. boeticus</i> on <i>Crotalaria mucronata</i>	
<i>Trichogrammatoidea nana</i> (Zehntner)	Hessaraghatta	Ex. Unidentified lepidopterous eggs on <i>Cassia auriculata</i>	
<i>Trichogrammatoidea fulva</i> Nagaraja	Chikkaballapur	Ex. Eggs of <i>Cryptophlebia ombrodelta</i> on tamarind pods	
<i>Trichogrammatoidea sp. nr. Fulva</i>		Ex. Unidentified lepidopterous eggs on <i>Cassia auriculata</i>	
<i>Trichogrammatoidea armigera</i> Manjunath	Hessaraghatta	Ex. Eggs of <i>Lampidesboeticus</i> on <i>C. mucronata</i>	

<i>Trichogrammatoideasp. nr. armigera</i>	Hessaraghatta	Ex. Eggs of <i>L. boeticus</i> on <i>C. mucronata</i>
<i>Trichogrammatoidearobusta</i> Nagaraja	Hessaraghatta	Ex. Eggs of <i>L. boeticus</i> on <i>C. mucronata</i>
<i>Trichogrammatoideasp. nr. robusta</i>	Hessaraghatta	Ex. Eggs of unidentified lepidopteran on pods of <i>C. auriculata</i>
<i>Uscanafemoralis</i> Pajni	Hessaraghatta	Ex. Bruchid eggs on dry pods of <i>C. auriculata</i>
<i>Uscanasp. no. 1</i>	Hessaraghatta	Ex. Bruchid eggs on pods of <i>C. auriculata</i>
<i>Uscanasp. no. 2</i>	Bijwara	Ex. Bruchid eggs on tamarind pod
